### ODJELJAK 4: MJERE PRVE POMOĆI

#### 4.1 Opis mjera prve pomoći:

The symptoms resulting from intoxication can appear after exposure, therefore, in case of doubt, seek medical attention for direct exposure to the chemical product or persistent discomfort, showing the SDS of this product.

##### Udisanjem:

This product is not classified as hazardous through inhalation. However, in case of intoxication symptoms it is recommended to remove the person affected from the area of exposure, provide clean air i keep at rest. Request medical attention if symptoms persist.

##### Dodirom s kožom:

Remove contaminated clothing i footwear, rinse skin or shower the person affected if appropriate with plenty of cold water and neutral soap. In serious cases see a doctor. If the product causes burns or freezing, clothing should not be removed as this could worsen the injury caused if it is stuck to the skin. If blisters form on the skin, these should never be burst as this will increase the risk of infection.

##### Dodirom s očima:

Rinse eyes thoroughly with water for at least 15 minutes. If the injured person uses contact lenses, these should be removed unless they are stuck to the eyes, in which case removal could cause further damage. In all cases, after cleaning, a doctor should be consulted as quickly as possible with the SDS for the product.

##### Gutanjem/udisanjem:

Do not induce vomiting, but if it does happen keep the head down to avoid aspiration. Keep the person affected at rest. Rinse out the mouth i throat, as they may have been affected during ingestion.

#### 4.2 Najvažniji simptomi i učinci, akutni i odgođeni:

Akutni i odgođeni učinci navedeni su u odjeljcima 2 i 11.

#### 4.3 Upućivanje na potrebu hitne liječničke pomoći i posebne obrade:

Nije relevantno

### ODJELJAK 5: MJERE ZA SUZBIJANJE POŽARA

#### 5.1 Sredstva za gašenje:

##### Prikladna sredstva za gašenje:

Product is non-flammable under normal conditions of storage, handling i use. In the case of combustion as a result of improper handling, storage or use preferably use polyvalent powder extinguishers (ABC powder), in accordance with the Regulation on fire ruku systems.

##### Neprikladna sredstva za gašenje:

Nije primjenjivo

#### 5.2 Posebne opasnosti koje proizlaze iz tvari ili smjese:

As a result of combustion or thermal decomposition reactive sub-products are created that can become highly toxic and, consequently, can present a serious health risk.

#### 5.3 Savjeti za vatrogasce:

## Amarella Laundry Perfume PLUS Classic

### ODJELJAK 5: MJERE ZA SUZBIJANJE POŽARA (nastavak)

Depending on the magnitude of the fire it may be necessary to use full protective clothing i Self Contained Breathing Apparatus. Minimum emergency facilities i equipment should be available (fire blankets, portable first aid kit,...)

#### Dodatne odredbe:

Act in accordance with the Internal Emergency Plan i the Information Sheets on actions to take after an accident or other emergencies. Eliminate all sources of ignition. In case of fire, cool the storage containers i tanks for products susceptible to combustion, explosion or BLEVE as a result of high temperatures. Avoid spillage of the products used to extinguish the fire into an aqueous medium.

### ODJELJAK 6: MJERE KOD SLUČAJNOG ISPUŠTANJA

#### 6.1 Osobne mjere opreza, zaštitna oprema i postupci u slučaju opasnosti:

Za osoblje koje nije angažirano u hitnim situacijama:

Isolate leaks provided that there is no additional risk for the people performing this task. Evacuate the area i keep out those without ruku. Personal ruku equipment must be used against potential contact with the spilt product (See section 8).

Above all prevent the formation of any vapour-air flammable mixtures, through either ventilation or the use of an inert medium.

Remove any source of ignition. Eliminate electrostatic charges by interconnecting all the conductive surfaces on which static electricity could form, i also ensuring that all surfaces are connected to the ground.

#### Za interventno osoblje:

Wear protective equipment. Keep unprotected persons away. See section 8.

#### 6.2 Mjere zaštite okoliša:

Avoid at all cost any type of spillage into an aqueous medium. Contain the product absorbed appropriately in hermetically sealed containers. Notify the relevant authority in case of exposure to the general public or the environment.

#### 6.3 Metode i materijali za sprječavanje širenja i čišćenje:

Preporučuje se:

Prevent the entrance of product in drains, sewers or watercourses. Absorb the spill using sand or inert absorbent i move it to a safe place. Do not absorb in sawdust or other combustible absorbents. Collect the product in appropriate containers i manage it according to current nacionalnog zakonodavstva.

Prolivi u vodu ili more:

Mali prolivi:

Contain spillage using barriers or similar equipment. Use suitable absorbents for collection i treat the waste in accordance with current regulations.

Veliki prolivi:

If possible, contain spillage in open water using barriers or similar equipment. If this is not possible, try to control its spread i collect the product with suitable mechanical means. Always consult experts before using dispersants i make sure you have the necessary approvals if they are to be used. Treat the waste according to current regulations.

#### 6.4 Upućivanje na druge odjeljke:

B.- Tehničke preporuke za sprječavanje požara i eksplozija

Avoid the evaporation of the product as it contains flammable substances, which could form flammable vapour/air mixtures in the presence of sources of ignition. Control sources of ignition (mobile phones, sparks,...) i transfer at slow speeds to avoid the

creation of electrostatic charges. Consult section 10 for conditions i materials that should be avoided.

C.- Tehničke preporuke o općoj higijeni na radnom mjestu

Do not eat or drink during the process, washing hands afterwards with suitable cleaning products.

D.- Tehničke preporuke za sprječavanje rizika za okoliš

Due to the danger of this product for the environment it is recommended to use it within an area containing contamination control barriers in case of spillage, as well as having absorbent material in close proximity.
